AB	The present invention relates to a synthetic sensor peptide for the detection and/or measurement of a kinase or phosphatase activity of proteins wherein the synthetic sensor peptide serves as fluorescence resonance energy transfer (FRET) substrate undergoing a conformational change upon phosphorylation by said proteins which conformational change can be detected through FRET. Further, the present invention is concerned with a process for the qual. and/or quant. detn. of proteins with kinase or phosphatase activity comprising said synthetic sensor peptide.				
ST	peptide sensor kinase phosphatase activity sequence phosphorylation FRET
